City of Moscow, City Hall c/o Bill Belknap, City Supervisor 206 East 3rd Street P.O. Box 9203 Moscow ID 83843 Phone (208) 883-7000 Fax (208) 883-7018

Website: www.ci.moscow.id.us Hearing Impaired (208) 883-7019 March 15, 2023

Honorable Mayor, City Council Members, and Citizens of the City of Moscow:

We are pleased to submit to you the audited Annual Comprehensive Financial Report (ACFR) for the City of Moscow, Idaho (hereinafter "City") for the fiscal year October 1, 2021 through September 30, 2022.

Idaho state law requires that all general-purpose local governments publish, within six months of the close of each fiscal year, a complete set of financial statements presented in conformity with Generally Accepted Accounting Principles (GAAP), Governmental Accounting Standards Board (GASB), and an audit report in accordance with auditing standards generally accepted in the United States of America by Certified Public Accountants. Pursuant to that requirement, we hereby issue the audited annual financial statements of the City for the fiscal year ended September 30, 2022.

The City of Moscow Finance Department has prepared this report to present the financial position of the City as of September 30, 2022. We believe the information, as presented, is accurate in all material aspects; that it is presented in a manner designed to set forth fairly the financial position and results of operations of the City as measured and reported by the financial activity of its various funds; and that all disclosures necessary to enable the reader to gain an adequate understanding of the City's financial affairs have been included. Responsibility of both the accuracy of the data, and the completeness and fairness of the presentation and disclosures rests with City management.

Moscow's Mission Statement:

The City of Moscow delivers quality municipal services while ensuring responsible use of resources. We anticipate and meet the needs of our diverse population in order to build public trust and enhance a sense of community.

ACFR Presentation:

The ACFR was prepared by the City of Moscow Finance Department in accordance with GAAP and GASB. It is intended to provide sufficient information to permit the assessment of stewardship and accountability, to demonstrate legal compliance, and to facilitate management control. City management is responsible for establishing and maintaining an internal control structure designed to ensure that the assets of the City are protected from loss, theft, or misuse and to ensure adequate accounting data is compiled to allow for the preparation of financial statements in conformity with accounting principles generally accepted in the United States of America. In addition, the City maintains extensive budgetary controls. The objective of these controls is to ensure compliance with legal provisions embodied in the annual appropriated budget adopted by City Council. Activities of all funds are included in the annual adopted budget.

Presnell Gage, PLLC, Accounting and Consulting, a firm of Certified Public Accountants, have issued an opinion that the City's financial statements were presented fairly in all material respects for the year ended September 30, 2022. The Independent Auditor's report is located at the front of the financial section of this report.

The ACFR is presented in four sections: Introductory, Financial, Statistical, and Compliance. The Introductory section, which is unaudited, includes this Letter of Transmittal, a City organizational chart, the Government Finance Officers Association (GFOA) Certificate of Achievement for Excellence in Financial Reporting awarded for the 2021 fiscal year, and a list of the City's principal elected officials. The Letter of Transmittal is designed to complement the Management's Discussion and Analysis (MD&A) and should be read in conjunction with the MD&A. The City's MD&A can be found in the financial section along with the independent auditor's opinion, basic financial statements (including entity-wide fund financial statements), notes to the basic financial statements, required supplementary information and supplemental information, combining and individual statements, and schedules for the City's funds. The Statistical section, which is unaudited, includes selected financial and demographic information, generally presented on a multi-year basis.

City of Moscow Profile:

Moscow Idaho is located among the rolling Palouse hills of Latah County in northern Idaho and the western City limits border the State of Washington. The City encompasses a land area of approximately 7.4 square miles. Moscow is the county seat and largest city in Latah County and with a population of 25,850 (2022 U.S. Census Bureau) and is the 13th largest city in Idaho. Latah County's population is 40,313 (2020 U.S. Census Bureau) and comprises the majority of the eastern portion of the Palouse region, which is world-renowned for its agriculture and fertile soil. Latah County is the only county in the United States that was established by an act of Congress. Originally part of Nez Perce County, Latah County was created in 1888 and named for Latah Creek, which is located in its northwest corner.

The City of Moscow is home to the University of Idaho, the state's land grant institution and primary research university. Eight miles (13 km) west is Pullman Washington, home of Washington State University, also a land-grant institution. The close proximity of these two universities creates an environment that is a wonderful combination of small-town comfort and safety, together with the cultural, recreational, and educational opportunities of a larger city.

The City of Moscow was incorporated on July 12, 1887. The City operates under a Mayor/Council form of government consisting of an elected mayor and six council members. The mayor and six council members are elected on an at-large, non-partisan basis, and the council serves staggered 4-year terms, with one-half of the council positions elected every two years. The City is considered to be a "full service" city and provides the following services authorized by charter and by Title 50 of the *Idaho Code*: general government, public safety, culture and recreation, transportation, water, sewer, stormwater and sanitation.

Moscow's City Council is required to adopt a final budget no later than the close of the current fiscal year. The City's fiscal year starts on October 1 and ends on September 30. The annual budget serves as the foundation for the City's management and financial planning and controls and is prepared by the Administration and Finance Departments. Department managers are responsible for their department's budgetary controls. The budget is adopted at the fund level by the City Council following a public hearing and meets the state's legal requirement for a balanced budget of revenues and expenditures. The same public budget process is necessary on any occasion when budget amendments are necessary to accept unanticipated revenues and expenditures.

Moscow Idaho is settled into the Palouse, a landscape historically and currently inhabited by the Nimiipuu (Nez Perce) people indigenous to the region. Incorporated in 1887, the City's modern history is rooted in agriculture; the region is a major global producer of peas and lentils. The presence of farming in the community goes far beyond commerce, however, as grain silos and other architectural features announce agricultural endeavors as part of the community's aesthetic identity. The City is home to the University of Idaho (UI), a land grant institution established in 1889. School spirit infuses the atmosphere of the City with the balance of gravitas and celebration that characterizes the educational experience. Moscow's culture is woven together with the work of passionate citizens and creative institutions dedicated to the arts in all their forms. The City of Moscow stands out amongst Idaho cities in many ways, and its tradition of Arts and Culture programming contributes greatly to that unique identity.

Listed below are City-sponsored cultural offerings:

- Moscow Farmers Market (MFM) is held every Saturday from May through October. Established in 1977, the MFM is the longest-running market in the state of Idaho and provides farmers, artisans, and customers the opportunity to connect with one another in Moscow's downtown core;
- Third Street Gallery and The Box Gallery, both located in Moscow City Hall, bring art installations into the heart of the public process:
- Artwalk is a monthly event featuring multiple forms of art at host locations throughout the community on the 3rd Thursday of each month from October through June;
- Entertainment in the Park is a summer performance series at Moscow's East City Park, featuring programming, especially for children and families;
- Palouse Plein Air is an annual painting event that brings artists together in celebration of the picturesque Palouse;
- Moscow Poet Laureate increases awareness of the role that poetry and literature play in the community;
- Annual tree-lighting, Light up the Season Parade, and other downtown events get the whole community into the spirit of the winter season;
- Public Art in Moscow thrives with an annually-refreshed temporary collection, a portable collection, and features works in the permanent collection made possible by the City's 2004 adoption of a 1% for the Public Arts ordinance.

The City of Moscow is proud to partner with the following cultural institutions and events:

- The University of Idaho's Prichard Art Gallery, Lionel Hampton Jazz Festival, and Festival Dance;
- Moscow Renaissance Fair;
- Rendezvous in the Park;
- The Kenworthy Performing Arts Center;
- Latah County Library District;
- Moscow Contemporary;
- The 1912 Center, a property owned by the City and operated through contract by the non-profit organization Heart of the Arts, Inc.

The City has a highly skilled and educated workforce supporting many thriving businesses, as well as the University of Idaho and nearby Washington State University. The University of Idaho is a nationally recognized research institution committed to undergraduate and graduate research education, with extension services responsive to Idaho and to the region's business and community needs. Many students take advantage of an emphasis on undergraduate research opportunities in computer science, transportation innovation, environmental science, evolutionary biology, and biomedical research. The University of Idaho enrolls 11,507 students. As Idaho's land grant research university, the University of Idaho offers students a complete living and learning experience. The residential campus in Moscow matches architectural beauty with a small and friendly academic community. Outdoor recreational activities complement the many cultural amenities. The University of Idaho ranked in the top 30 in the nation as a "great university to hit the books and backcountry" by Outside magazine. Living and learning in Moscow will put you just minutes from opportunities for skiing, snowboarding, whitewater rafting, biking, climbing, camping, fishing, and more.

Local Economic Outlook:

Moscow's major employers are heavily represented in the sectors of education, health care, retail, and government. These four sectors represent 65 percent of Moscow's economy. The Latah County unemployment rate (not seasonally adjusted) for the month ending in September 2022 was 2.2 percent compared with 2.0 percent in September 2021. The September 2022 unemployment rate (not seasonally adjusted) of 2.2 percent was below a state unemployment rate of 2.5 percent and a national unemployment rate of 3.5 percent.

Latah County saw employment expansion in the following sectors from 2020 – 2021:

- Construction (9.7 percent)
- Manufacturing (8.1 percent)
- Wholesale Trade (0.6 percent)
- Retail Trade (8.0 percent)
- Information (3.1 percent)
- Real Estate (0.6 percent)
- Professional and Technical Services (8.3 percent)
- Management (16.7 percent)
- Administrative Services (4.3 percent)

- Educational Services (30.4 percent)
- Accommodation and Food Services (5.7 percent)

Latah County saw employment contraction in the following sectors:

- Finance and Insurance (-2.5 percent)
- Health Care and Social Assistance (-0.4 percent)
- Arts, Entertainment, and Recreation (-2.9 percent)

Real Estate:

- The average home sale price in the City of Moscow increased 15.1 percent from \$346,727 in 2021 to \$399,247 in 2022, after a 10.4 percent increase the prior year.
- The average home sale price in Latah County increased 17.2 percent from \$338,270 in 2021 to \$396,525 in 2022 after an 18.3 percent increase the prior year.

Tourism:

• In the 2022 calendar year, Latah County transient occupancy tax increased by approximately 19 percent.

Building Permits:

 Total permitted construction value in the City of Moscow dropped from \$47.3 million in 2021 to \$37.5 million in 2022, but remained above the 10year average of \$30.6 million.

Moscow continues its economic development efforts. The Moscow Urban Renewal Agency (MURA) manages one active urban renewal district called the Legacy Crossing District, which covers approximately 169 acres and includes former railroad right-of-way and industrial areas, comprising the majority of the blighted and underutilized properties located between Moscow's historic downtown and the University of Idaho. The primary objective in creating this District was to eliminate conditions impeding the City's economic growth in the area. The MURA's focus is to assist and encourage the transition of properties from former agricultural and/or industrial uses to new uses and economic vibrancy adding to the quality of civic life and improving the public safety of citizens and visitors.

The Legacy Crossing District will have long-term positive impacts on the community. The re-urbanization of inner-city districts, particularly those with land uses transitioning from industrial uses to mixed-uses, requires an extended planning horizon. Redevelopment activities continue within the District and on the MURA-owned property located at the southwest corner of the intersection of Sixth and Jackson Streets, including the completion of environmental remediation activities and the planning for the redevelopment of the site.

The City is a leader in a consortium that maintains a 15.4-mile fiber optic network serving government, education, medical, and business facilities in the City. Other members of the consortium include the Idaho Transportation Department, Moscow School District #281, and Gritman Medical Center.

The Intermodal Transit Center (ITC) is home to public transit provider Sustainable Moscow Area Regional Transportation (SMART), which provides services to area residents and the University of Idaho. The fixed-route public transportation service in Moscow continues to see increased ridership. The ITC houses administrative and passenger service areas, exterior covered passenger boarding areas, bicycle parking facilities, and transit vehicle parking and serves as a link between transportation service providers to facilitate the seamless integration of transportation options for the Palouse region. Public transportation services are provided by not only SMART, but also Northwest Trailways (providing inter-city passenger service) and the University of Idaho's Vandal Access Service.

Tourism is Idaho's third-largest industry statewide. The City provides and hosts many cultural opportunities along with other art attractions. The arts, entertainment and recreation sectors include a wide range of establishments that operate facilities or provide services to meet varied cultural, entertainment, and recreational interests of the local and surrounding population.

Long-Term Financial Planning for the City:

The City's future capital improvement projects include:

- Street, sidewalk, and utility improvements on Lilly and First Streets;
- A pedestrian underpass on South Main Street;
- Landscape enhancements at the south couplet;
- Installation of amenities in the downtown core of the City, including bicycle racks, street trees, vintage lighting, and other features consistent with the Historic and Central Business district themes;
- Continued upgrades to deficient sidewalks and the installation of missing sidewalks throughout the City;
- Water Reclamation and Reuse Facility (WRRF) improvements to meet the National Pollutant Discharge Elimination System (NPDES) permit issued by the United States Environmental Protection Agency (EPA);
- Various sewer and water main replacements and rehabilitations:
- Various street surface restoration projects;
- Various park, pathway, and playground improvements;
- Renovations of two water booster stations utilized to provide consistent water pressure to all sectors of the City.

The City has completed several comprehensive plans, including water, sewer, intermodal transportation, parks, and facilities. These plans define the operational and capital needs for those service sectors. These planning documents provided the information necessary to develop the City of Moscow's Strategic Plan as well as the City's Capital Improvement Plan (CIP) are excellent resources for reviewing progress made on the major challenge areas adopted by the Moscow City Council in that plan. In turn, Administration and Finance are then able to continue the development of a comprehensive long-range financial plan to assist policymakers in developing strategies to meet the City's operational and capital needs.

The City has fund balances assigned for long-term capital needs of \$7.5 million for general government purposes and \$28.7 million restricted for water, sewer, stormwater, and sanitation, which will assist in the long-term capital improvement projects list.

Financial Policies:

On September 7, 2011, the City Council adopted Resolution No. 2011-11. This Resolution established financial policies for the City, which address general finance, revenue, operating expenditure, capital expenditure, and debt and fund balance working capital. The City implements all GASB pronouncements in order to remain in compliance with the accounting standards for governments. This year, the City's financial statements reflect all changes to meet the guidelines of the GASB 68 pronouncement.

GFOA Award for Excellence in Financial Reporting:

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the City for its annual comprehensive financial report for the fiscal year ending September 30, 2021. This was the nineteenth consecutive year that the City has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized annual comprehensive financial report. This report must satisfy GAAP, GASB, and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only and, therefore, must be applied for each subsequent year. Staff represents that the City's current Annual Comprehensive Financial Report continues to meet the Certificate of Achievement Program's requirements, and the ACFR ending September 30, 2022, will be submitted to the GFOA for consideration.

Audited Statements Introduction:

Presnell Gage, PLLC, Accounting and Consulting, a firm of Certified Public Accountants, has audited the City's financial statements. The goal of the annual independent audit is to provide reasonable assurance that the financial statements of the City are free of material misstatement. The independent audit examines, on a test basis, evidence supporting the amounts and disclosures in the financial statements. The independent audit also involves the assessment of the accounting principles used and the significant estimates made by management and the evaluation of the presentation of the overall financial statements. The independent auditor, based upon the audit, concluded there was a reasonable basis for rendering an unmodified opinion that the City's financial statements for the fiscal year ended September 30, 2022, are fairly presented in conformity with GAAP and GASB. The independent auditor's report is presented as the first component of the financial section of this report.

The independent audit of the City's financial statements requires the independent auditor to report not only on the fair presentation of the financial statements but also with special emphasis on the audited government's internal controls and compliance with legal requirements. Because the cost of controls should not exceed the benefits to be derived, the objective is to provide reasonable, rather than absolute assurance, that the financial statements are free of any material misstatements.

Acknowledgments:

The preparation of this report would not have been possible without the professional, efficient, and dedicated services of the City's Audit Committee and the entire staff of the Finance and Administration Departments. Appreciation is also extended to all members of the other City departments who assisted and contributed to the preparation of this report. Our thanks are also extended to the Mayor and the City Council for their support in maintaining the highest standards of professionalism in the management of the City's finances.

Respectfully submitted,

INDEPENDENT AUDITOR'S REPORT

Members of the City Council City of Moscow, Idaho Moscow, Idaho

Report on the Audit of the Financial Statements

Opinions

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Moscow, Idaho, as of and for the year ended September 30, 2022, and the related notes to the financial statements, which collectively comprise the City of Moscow, Idaho's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Moscow, Idaho, as of September 30, 2022, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the City of Moscow, Idaho, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the City of Moscow, Idaho's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, and design and perform audit procedures responsive to those risks. Such procedures
 include examining, on a test basis, evidence regarding the amounts and disclosures in the financial
 statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the City of Moscow, Idaho's internal control. Accordingly, no such opinion is
 expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the City of Moscow, Idaho's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, and other required supplementary information on pages 21 through 41 and 81 through 86, respectively, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context.

We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Moscow, Idaho's basic financial statements. The combining and individual nonmajor fund financial statements, budgetary comparison schedules, capital asset schedules, and schedule of expenditures of federal awards, as required by Title 2 *U.S. Code of Federal Regulations (CFR) Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*, are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual nonmajor fund financial statements and the schedule of expenditures of federal awards are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory and statistical sections but does not include the basic financial statements and our auditor's report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 3, 2023, on our consideration of the City of Moscow, Idaho's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City of Moscow, Idaho's internal control over financial reporting and compliance.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The discussion and analysis of the financial performance of the City of Moscow (hereinafter the "City") provides an overview of the City's financial activities for the fiscal year ended September 30, 2022 (FY2022) and is intended to:

- Assist the reader in focusing on significant financial issues;
- Provide an overview of the City's financial activity;
- Identify changes in the City's financial position (its ability to address challenges in subsequent years); identify any material deviations from the financial plan and the adopted budget; and
- Identify individual fund issues or concerns. Since the Management's Discussion and Analysis (MD&A) is designed to focus on the report year's activities, resulting changes, and currently known facts, please read it in conjunction with the Transmittal Letter found in the introductory section (page 6) and the City's financial statements beginning on page 43.

Financial Highlights

- The City's general fund (the City's primary operating fund), on a current financial resource basis, reported a fund balance increase for FY2022 of \$899,943 (12.4%) as a result of the following: the committed fund balance, which includes drug enforcement of \$67,200 and an increase in working capital of \$412,663 (8.9%) to \$5,069,000. Assigned fund balance includes a decrease in employee compensated absences of \$27,106 (3.5%) to \$746,059 while general governmental health programs decreased by \$2,000 (3.6%) to \$53,500.
- Working capital is the funding necessary to meet the cash flow needs of any particular fund. In compliance with the City's adopted financial policies, working capital is reported on the balance sheet for governmental funds. The General Fund working capital increased in FY2022 by \$412,663 (8.9%) to \$5,069,000. The Street Fund working capital for FY2022 increased by \$195,726 (22.7%) to \$1,059,124. The Recreation and Culture Fund working capital for FY2022 increased by \$187,262 (24.9%) to \$937,915.
- The City of Moscow has an investment policy that manages and directs the Finance Director and provides a guide to invest available funds. In FY2020, the City updated its Investment Policy, which can be found in Resolution #2020-02. In short, the investment policy prioritizes City investments by several factors including safety, liquidity, and yield. The City invests in U.S. Agencies containing adequate guarantees. Bond values can change inversely to interest rate changes during the time that the City holds the bond. When bonds mature, they are valued at 100% of the bond price (par).
 - o In FY2019, the City reviewed its investment strategies and engaged an Investment Advisory Committee consisting of financial professionals associated with the University of Idaho and Lewis-Clark State College to formulate a sustainable investment strategy focused on minimizing risks and maximizing returns on these public dollars. This strategy was implemented in FY2020, which included entering into an asset management agreement with Moreton Asset Management, LLC, which was continued through FY2022.
- Governmental activities program revenue increased \$850,695 (7.4%) to \$12,299,483 in FY2022.
 This is mainly due to an increase in capital grants and contributions. In FY2022, the City complied with the single audit reporting requirements and federal funding received totaled \$3,931,827 compared with \$2,876,374 the prior year.

- Business-type activities (enterprise funds) program revenue increased in FY2022 by \$470,702 (2.1%) to \$23,272,488. The new Stormwater utility added \$1,163,513 to program revenue while Capital grants and contributions decreased by \$977,914. FY2022 included a 5.0% water rate increase, a 2.25% increase in sewer rates, and no change to residential sanitation and stormwater rates. Both water and sewer rate adjustments were made in conformance with the recommendations of the rate study adopted by the City Council. Water connection fees are comprised of meter charges and general facility charges.
- The City continued work on water system improvements throughout the City. The largest project consists of the second phase of the replacement of six water booster stations (two remaining stations) and associated water main improvements for a cost of approximately \$4.0 million. The Booster Station's project is needed to address fire-flow deficiencies in boosted zones located at higher elevations in the City. To finance these projects, the City is combining a loan obtained from the Idaho State Revolving Loan Fund for water system improvements (administered by the Idaho Department of Environmental Quality (IDEQ)) with City of Moscow Water Capital Program funding. The first phase of the Booster Stations project (the first three stations) is complete. The design of the second phase of the Booster Station's project is complete and construction began in the winter of 2022.
- In FY2022, the City received \$3,931,827 in federal grant funding reimbursements which contributed to various City projects related to disaster assistance and in response to the COVID-19 pandemic. The federal funding assisted several City departments including Public Works, Police, Parks, Arts, and Community Development:
 - The Economic Development Administration (EDA) under the U.S. Department of Commerce awarded funding to the City through the Economic Adjustment Assistance program to assist with the replacement of the Sixth Street Bridge, which was damaged during the April 2019 flood event. The new single-span multimodal bridge will include two vehicular travel lanes, sidewalks, and bike lanes. The project was bid and awarded for construction during FY2022 (\$158,439).
 - The Idaho Department of Commerce (IDOC) under the US Department of Housing and Urban Development awarded the City an Idaho Community Development Block Grant (ICDBG) for Public Parks ADA Accessibility Improvements to enhance accessibility at both Mountain View Park and Indian Hills Park. The project included the remodeling of the existing Mountain View Park restroom building to create four single-occupant ADA-accessible restrooms. The Indian Hills Park project includes the installation of a precast restroom with a connecting pathway and one accessible ADA parking space. In FY2022, the reimbursable project expenses included procurement, purchase, and delivery of the precast restroom (\$65,409).
 - The Bureau of Justice Assistance (BJA) provides funding to state and local law enforcement departments under the Bulletproof Vest Partnership (BVP) where individual jurisdictions receive funding for reimbursement of body armor purchases. The BVP Reauthorization Act of 2015 includes a provision that states the BJA may fund up to 50% of each armor vest purchased for law enforcement officers that are uniquely fitted for each individual. These vests are ballistic and stab resistant. The Moscow Police Department has participated in this program for many years. In FY2022, the City received a 50% reimbursement for the purchase of five vests (\$5,886).

- The American Relief Plan Act of 2021 (ARPA) provided funding to Non-Entitlement Units of Local Government (NEU) for local fiscal recovery funding. A NEU is any city in the State of Idaho with a population less than 50,000 that is not otherwise receiving direct funding from the US Treasury. The City allocated \$600,000 of the ARPA funding in FY2022 to the Stormwater Utility to fund the purchase of a new vacuum truck equipped with a high-pressure water jet system and a high-performance industrial vacuum. The City also awarded \$609,694 in assistance to small businesses and community and social service non-profit organizations located in or providing services in the Moscow city limits to help them recover from the COVID-19 pandemic (1,209,694).
- The U.S. Department of Transportation provides funding to the Idaho Transportation Department (ITD) which operates the Office of Highway Safety (OHS) to provide various Traffic Enforcement Mobilizations, which the Moscow Police Department (MPD) has participated in for multiple years. This mobilization program establishes project requirements and a funding process to support the enforcement efforts by Idaho law enforcement agencies to reduce deaths, serious injuries, and economic loss as part of the Strategic Highway Safety Plan (SHSP). The purpose is to address Idaho's own unique circumstances and specific highway needs. The program funds overtime enforcement hours and/or traffic enforcement equipment for hours worked during designated mobilizations or through mini-grants for special events held in Moscow to address the City's specific driver safety needs. In FY2022, mobilization events provided reimbursement for overtime hours for the MPD (\$3,786).
- The National Highway Traffic Safety Administration (NHTSA) sponsors a federal grant program available to the Idaho Transportation Department (ITD) Office of Highway Safety (OHS). This program is also referred to as the Selective Traffic Enforcement Program (STEP) which addresses specific behaviors related to traffic safety priority areas and safety deficiencies within local law enforcement jurisdictions. The STEP is focused on combatting traffic crashes resulting in fatal and serious injuries. This grant funding reimburses law enforcement departments for the time dedicated to traffic enforcement. Recipients are required to track problem identification including objectives, performance measures and targets, and budgeted expenses. The annual maximum request for the program is 2,080 regular-time traffic officer enforcement hours with allowable benefit percentages. Requests can also include a maximum of 200 hours of overtime and equipment purchases (\$94,131).
- The City received an Idaho Transportation Department (ITD) award from the Surface Transportation Program (STP) for a planned enhancement project to improve traffic flow and safety from Sixth Street to Joseph Street on Mountain View Road. The project included widening the existing 24-foot wide two-lane rural roadway to a 36-foot wide two-lane urban road including bike lanes and turn lanes at select street intersections. The project also included the installation of curbs, gutters, and sidewalks along the corridor while improving ADA accessibility. Additional project features included a rectangular rapid flash beacon (RRFB) on Seventh Street and Mountain View Road for pedestrian crossing as well as intersection improvements at Joseph Street and Mountain View Road. The final project construction elements included a roundabout at Sixth Street and Mountain View Road for traffic flow and safety improvements. Expenses for FY2022 included construction bidding, utility relocations, construction, and construction inspection (\$1,076,531).

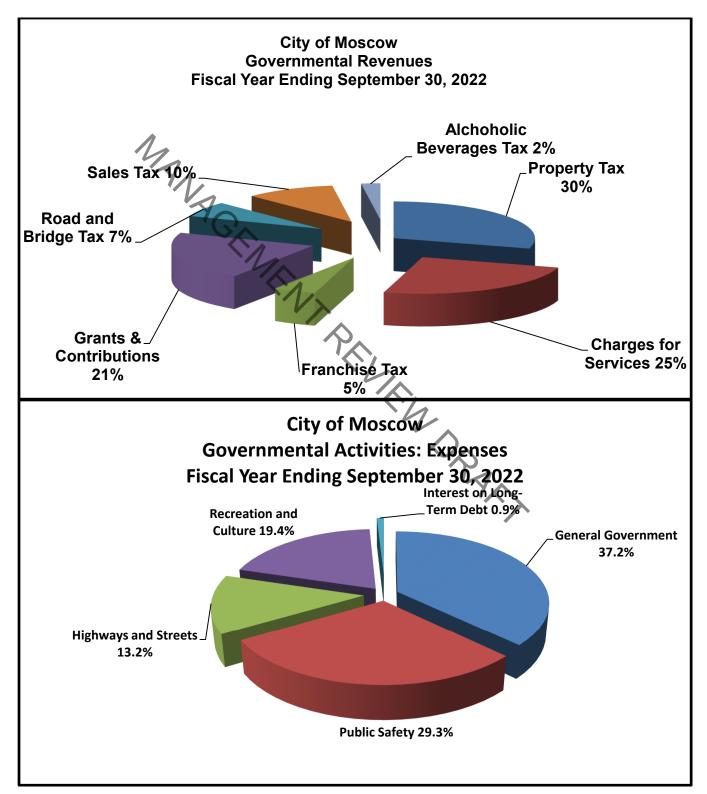

- The Local Highway Safety Improvement Program (LHSIP) grant managed by the Local Highway Technical Assistance Council (LHTAC) on behalf of ITD was awarded to the City for Public Avenue Corridor Safety Improvements. The project will provide a pedestrian/bike friendly environment and driver cautions through the installation of curbing, advance warning signs for curves, and reduction of roadside hazards to prevent roadway departures. The project also includes retroreflective signage, thermoplastic crosswalk bars, and a permanent concrete splitter island at the intersection of Polk Street and Public Avenue. In FY2022, the City was reimbursed for expenses including professional consultant services for surveying, mapping, right-of-way review, and preliminary and conceptual design (\$62,156).
- The Local Highway Safety Improvement Program (LHSIP) grant managed by the Local Highway Technical Assistance Council (LHTAC) on behalf of ITD was awarded to the City for Sixth Street Safety Improvements to include installation of ADA-compliant curb extensions from Jefferson Street to Almon Street to reduce the pedestrian crossing length and improve pedestrian visibility. The project also included the improvement of pedestrian ramps and crosswalks on Sixth Street at intersections to eliminate gaps in the ADA-compliant corridor that connects the University of Idaho to the downtown central business district. Project expenses in FY2022 included project inspection and construction costs (\$297,845).
- The Local Highway Safety Improvement Program (LHSIP) grant managed by the Local Highway Technical Assistance Council (LHTAC) on behalf of ITD was awarded to the City for a Third Street/SH8 Corridor safety project from State Highway 8 to Lieuallen Street, including demolition and removal of deteriorated and non-ADA compliant infrastructure comprised of concrete sidewalks, outdated curb ramps, and unused vehicle access approaches. The project also included the installation of new sidewalks, curbs, gutters, pedestrian ramps, crosswalks, and LED luminaires to improve night-time safety. Project expenses during FY2022 included project inspection and construction costs (\$818,120).
- The Idaho Commission on the Arts (ICA) receives an annual appropriation from the National Endowment of the Arts to support public programs in the arts and sub-awards funds to non-profit and municipal organizations throughout Idaho. The purpose of the program is to expand arts engagement and increase arts participation. The program supports the creative, cultural, professional, and economic development of communities through public programming of the arts. In FY2022, the Moscow Arts Department received funding for general operating support from ICA Public Programs in the Arts (\$7,224).
- The Department of Health and Human Services funds the Idaho Office of Drug Policy through the Partnership for Success Law Enforcement Grant Funding program. The Moscow Police Department (MPD) receives funding from this grant aimed to prevent underage drinking, marijuana use, and methamphetamine use in Moscow. The funding is used to conduct compliance checks, interdiction activities, party patrols, shoulder tap operations, and provide presentations on topics related to the targeted prevention focuses. MPD began participation in the program in July of 2019 and in FY2022, the MPD received reimbursement for police officer enforcement and patrol operations per the award parameters (\$2,229).

- The Federal Emergency Management Agency (FEMA) announced on June 12, 2019, that the President approved federal disaster assistance for the State of Idaho to supplement state, tribal, and local recovery efforts in areas affected by severe storms, flooding, landslides, and mudslides during April 7 13, 2019. The City was greatly impacted by a city-wide flash flood on April 9, 2019, due to heavy rains. FEMA representatives held a meeting with the City on May 6, 2019, to begin the process of data collection and damage assessment. The submittal of documentation for various eligible projects included emergency protective measures, donated resources, damages to facilities and equipment at the wastewater treatment plant, Paradise Path, Kiwanis Park, Mountain View Park, Highway 8 underpass, Joseph Street ditch repairs, culvert/headwall repairs at Mountain View and Joseph Street, city-wide debris removal, and project management costs. Clean-up costs and damages have totaled \$116,000 and reimbursement from federal and state disaster assistance funding to include administrative expense are \$109,000. The FY2022 year-end accrued expenses due for reimbursement are (\$57,171).
- The Idaho Office of Emergency Management (IOEM), Hazardous Mitigation Division, under the U.S. Department of Homeland Security, including FEMA awarded the City an Advanced Assistance grant to explore potential flood hazard mitigation alternatives and determine the most viable method to resolve flooding issues extending from the northeast city limits near Mountain View Park to the Paradise Creek crossing of the Troy Highway near the intersection with Styner and White Avenue; referred to as the "impacted area". The scope of work includes a Hydrologic and Hydraulic Study (H & H Study) of Paradise Creek (Phase I), an alternatives analysis, LiDAR and data collection, environmental considerations, application development, benefit-cost analysis, pre-engineering, and CLOMR application. The H & H modeling of the proposed study extends upstream to the area from Darby Road Bridge to the south of the Troy Highway (Idaho State Highway 8) crossing. The results of the H & H study will be used to select an alternative, prepare preliminary design documents and complete a benefit-cost analysis of the selected alternative in order to apply for additional funding to construct the recommended mitigation option. This project will be completed in FY2023 (\$73,206).
- Idaho State House Bill 312 remained effective in FY2022. This legislation implemented an increase in state fuel taxes with the intent that the additional funding would be used exclusively for the maintenance of bridges and roads and replacement projects at both the state and local levels. The City of Moscow received \$284,959 of HB312 funds in FY2022.

MANAGEMENT'S DISCUSSION AND ANALYSIS

General Fund revenues, comprised primarily of property taxes, charges for services, franchise fees, and state shared revenue and were used to support the following major activities:

Public Safety General Government Highways and Streets Recreation and Culture Interest on Long-term Debt

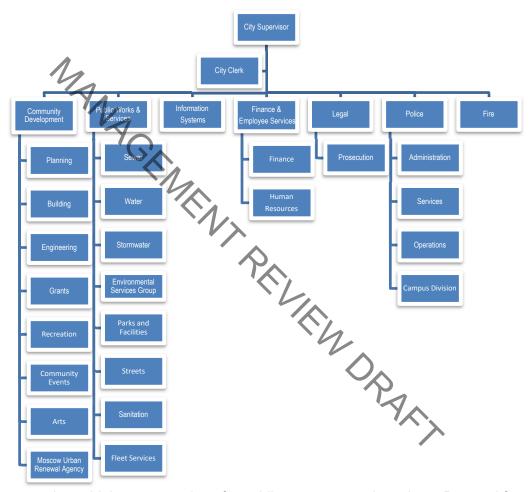

MANAGEMENT'S DISCUSSION AND ANALYSIS

Major Initiatives

Fiscal Year 2022 Highlights:

The City of Moscow operates under an administrative structure that includes two Deputy City Supervisors who oversee the management of relevant groups, according to like functions and budget type. The structure also allowed for redundant positions to be eliminated through attrition and reduced the management load for the City Supervisor.

There have never been higher expectations for public programs and services. Demand for services has grown, but so has public scrutiny, competition for limited resources, the complexity of regulations, and security and safety concerns. Along with these, frustrations with public services have also seemed to increase, a driving force behind the City's deep commitment to financial accountability, exceptional quality, consistent performance, and meaningful contribution to the entire Moscow community. Strategic planning is becoming a hallmark of how the City of Moscow manages these expectations in a transparent and fiscally sound manner.

The City's strategic plan, initially developed in 2015, has provided the foundation for overcoming many significant issues and major challenge areas facing the organization and, in turn, the community of Moscow. The Strategic Plan is based on data-driven research quantifying substantial issues facing the organization and/or community. Above all, strategic plans look over the horizon to determine those impending forces that must be addressed or planned for so they do not pose severe threats to the City's integrity, health, or quality of life.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Major Challenge Areas' are the most significant problems and/or issues the community faces and must address. Some challenges are internal – detailing issues that will affect the effectiveness, efficiency, productivity, or service quality. Others are external – impacting desired community outcomes that represent the quality of life and long-term community prosperity.

Once identified and listed comprehensively, these issues are then vetted and prioritized by the City Council to determine Major Challenge Areas, also known as MCAs. This prioritization process is undertaken every few years to provide an opportunity for new Council members to weigh in, identify new issues, prioritize them appropriately, and ensure agreement on the prioritization of focus for resources and staff time.

In January of 2021, staff provided an update to the Strategic Plan noting the many successes realized since 2015 and outline two new issues for Council's consideration in the prioritization process. Several minor changes were made in the adoption of Major Challenge Areas (MCA) in 2021, with MCAs prioritized as follows:

Significant progress has been made in achieving success to alleviate issues the City has faced as major challenge areas. Specifically, the recent completion of the construction of a new Police Services Facility as a result of a citizen-approved bond election in 2019 and regular budgeting and replacement of fire engines. The City's commitment to moving forward strategically, intentionally, and mindfully is steadfast and is proving to be a hallmark of the City's success. The City Council is currently working to update the Strategic Plan and a new plan is anticipated to be adopted in 2023.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The Strategic Plan has also paved the way for a comprehensive Capital Improvement Plan. The Capital Improvement Program (CIP) is a statement of the City of Moscow's plan to address long-term capital asset maintenance and development necessary to support the continued and expanded delivery of public services to the community. The CIP incorporates planned capital investments in the City's water and wastewater utilities, transportation systems, parks, and recreation facilities, and general government facilities. The continuous maintenance, repair, and reinvestment in these critical systems are essential to ensure that the City has the supporting infrastructure necessary to serve our current and future residents, businesses, and institutions.

This program strategically focuses on projects for a five-year period and is reviewed and updated annually. To be included in the CIP, a project should generally require a total expenditure of at least \$25,000, have a functional life of over five years, and/or extend the functional life or capacity of an existing capital asset. By providing a planned schedule, cost estimates, and location of public sector improvements, the CIP provides elected officials and the community with valuable information concerning proposed public facilities and their associated costs.

The City of Moscow promotes and implements sustainable practices across all departments. The City's interoffice recycling program has been revamped to streamline recycling practices across all City facilities. Other standardized practices include sustainable purchasing, reuse, and waste reduction strategies. With the combined success of the EcoDriver and fleet replacement programs, emissions and fuel consumption continue to decline. The City has set goals for Green House Gas emission reductions with biennial inventory updates. A number of budgeted projects have reduced carbon emissions and made City operations more efficient while saving the City money in power costs.

The Finance Department earned the prestigious Government Finance Officers Association (GFOA) Award for the City's Annual Comprehensive Financial Report for the nineteenth consecutive year.

The Moscow Volunteer Fire Department and Ambulance Company (MVFD) has been serving the Moscow community for more than 129 years. This organization operates with mostly volunteers who number approximately 105 firefighters and emergency medical personnel and 7 career staff. During FY2022, the volunteers of the MVFD responded to approximately 2,776 calls, averaging approximately 231 calls for service each month. The volunteers logged more than 9,000 hours of training to prepare themselves to serve and maintain the level of professionalism the citizens of Moscow have come to expect. In addition to the excellent emergency medical response provided by the volunteers, the MVFD has maintained a Class 3 ISO rating (2022 Insurance Services Office audit). This rating results in significant fire insurance savings to both residential and commercial property owners within Moscow, and is similar to the ISO ratings of much larger fire departments/communities such as the City of Boise and the City of Coeur d'Alene.

The City continues to be an effective regional partner in the areas of water research and conservation, actively supporting the work of the Palouse Basin Aquifer Committee (PBAC), promoting customer conservation efforts, and exploring alternative water resources, including surface water detention and expansion of treated effluent reuse infrastructure. Annually, approximately 80 million gallons of treated wastewater effluent from the City of Moscow Water Reclamation and Reuse Facility is land-applied for irrigation on the University of Idaho campus. The City supported PBAC's research and operations in the amount of \$47,000 in FY2022.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Sanitation collection rates were not increased for FY2022. Sanitation tipping (weight) related fees at the Solid Waste Processing Facility were contractually obligated to be adjusted annually, based on fluctuation to the *Consumer Price Index*. Solid Waste Disposal Contracts between the City of Moscow and Latah County, the cities of Bovill, Deary, Genesee, Juliaetta, Kendrick, Potlatch, and Troy were renegotiated and amended to reflect the findings of the FY2016 Rate Study update requiring tipping fee increases at the Solid Waste Processing Facility of 4.4% each year from FY2017 through FY2020 and 2% each year beginning in FY2021 through FY2023.

City Ordinance No. 2004-30 states that it is the policy of the City to support public art through the dedication of 1% of the total cost of public capital improvement projects to facilitate the installation of art in public places in order to beautify public areas, enhance the quality of life for Moscow citizens, attract tourism, and provide incentives to businesses to locate within the City. The ending balance at the close of FY2022 was \$157,250.

Parks and Recreation accomplishments during the year include the following:

- The Moscow Tree Commission received the 2022 Idaho Recreation and Parks Association Outstanding Innovative Program Award for the Moscow Heritage Tree Program.
- The Harvest Park Management Plan was developed and approved by Moscow City Council.
- The City of Moscow became a Bee City USA affiliate after a recommendation by the Parks and Recreation Commission.
- Anderson Frontier Park was designated as a pesticide-free park.
- The City of Moscow received funding from Public Health-Idaho North Central District to plant trees
 at Indian Hills Park and Mountain View Park for shading the playground areas. Funding also
 provided bike racks at Anderson Frontier Park, Mountain View Park, and Indian Hills Park.
- The Moscow Pathways Commission hosted the first annual pedestrian tour beginning at the Moscow School District Community Playfields and ending at Heron's Hideout.
- To recognize National Bike Month, the Moscow Pathways Commission hosted its annual bike tour in May and celebrated national Bike to Work Day on May 20, 2022.
- Pathway lighting was installed from Highway 95 to Styner Avenue along the Paradise Pathway.
- A pond circulator was installed at Hordemann Pond to improve the fishery and reduce algae in the pond, with partial funding from a donor.
- New drinking fountains, including bottle fillers and dog drinking fountains were installed at East City Park and Morgan's Orchard Park.
- Park staff rebuilt the boardwalk at Anderson Frontier Park.
- The ADA lift at the Hamilton-Lowe Aquatic Center was replaced.
- Five park benches were installed with funding from donors at Carol Ryrie Brink Nature Park, Kiwanis Park, East City Park, Indian Hills Park, and Anderson Frontier Park. Four trees were donated, three at Heron's Hideout and one at East City Park.

Report Layout: The City's Annual Comprehensive Financial Report (ACFR) consists of four sections: (1) the introduction section; (2) financial section; (3) statistical section; and (4) the compliance reporting section. Taken together, they provide an overview of the City. The components of the report include the following:

Management's Discussion and Analysis: This section of the report provides financial highlights, overview, and economic factors affecting the City. It is intended to serve as an introduction to the City's basic financial statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Basic Financial Statements: The City's basic financial statements comprise three components: (1) government-wide financial statements; (2) fund financial statements; and (3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

1. Government-Wide Financial Statements:

The government-wide financial statements focus on an entity-wide presentation using the accrual basis of accounting and are designed to provide readers with a broad overview of the City's finances in a manner similar to a private-sector business.

The statement of net position presents information on all of the City's assets and liabilities, with the difference between the two reported as net position. The difference is further separated into amounts restricted for specific purposes and unrestricted amounts. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the City is improving or deteriorating. The statement of net position focuses on resources available for future operations. In simple terms, this statement presents a snapshot view of the assets the City owns, the liabilities it owes and the net difference. The focus of the statement of net position (the "unrestricted net position") is designed to be similar to a bottom line or "net worth" for the City and its governmental and businesstype activities. The statement of activities presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement of net position for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave). This statement of net position summarizes and simplifies the user's analysis to determine the extent to which programs are self-supporting and/or subsidized by general revenues. The statement of activities focuses on both the gross and net cost of various activities, which are provided by the government's property tax and other revenues. This is intended to summarize and simplify the user's analysis of the cost of various governmental services and/or subsidy to various business-type activities and/or component units.

The governmental activities reflect the City's basic services, including general government, public safety, transportation, recreation and culture, and interest on long-term debt. A further explanation of these categories will assist the reader's understanding of the statements. General government consists of the following departments: legislative, executive, administration, finance, legal, human resources, general buildings and grounds, community development, non-departmental expenses, fleet, and information systems. Public Safety consists of the following departments: emergency communication, parking enforcement services, code enforcement, fire, and public health. Transportation consists of the following services: street repair and maintenance, street sweeping, streetlights, Intermodal Transit Center management, and coordination of resources with state and county highway projects. Recreation and Culture consists of the following departments: parks administration, maintenance and operation of City parks, recreation programs, Hamilton-Lowe Aquatics Center, Hamilton Indoor Recreation Center (HIRC), Eggan Youth Center, Moscow School District Community Playfield fund (MSDCP), 1912 Center, Arts, and Community Events. Finally, the interest on long-term debt consists of the 2019 general obligation bond interest payments for the construction of a new police facility. Property and roadway taxes, State revenue sharing, franchise fees, and user fees finance the majority of these aforementioned services.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The business-type activities reflect the following private sector type operations of water, sewer, stormwater and solid waste management utility services (which the financial statements list as "sanitation"), where the fee for service typically covers all costs associated with the operation, including depreciation and net investment in capital assets. These services are classified as Enterprise Funds.

The statements present an aggregate view of the City's finances. Government-wide statements contain useful long-term information as well as information for the just completed fiscal year. To assess the overall financial condition of the City, additional non-financial factors, such as changes in the condition of the City buildings, facilities, and equipment should also be considered.

2. Fund Financial Statements:

A fund is a fiscal and accounting entity that is used to provide control over resources that have been segregated for specific activities or objectives. Funds allow the City to track sources of funding and spending for specific programs and to demonstrate compliance with various regulatory requirements.

The City of Moscow maintains eighteen individual funds in six separate categories. The categories and their funds include:

- The General Fund is the City's chief operating fund, and accounts for all financial resources except those required to be accounted for in another fund.
- Special Revenue funds include the Street fund, Recreation and Culture Fund, Moscow School
 District Community Playfield fund (MSDCP), 1912 Center fund, and Transit Center fund. Special
 revenue funds are used to account for the proceeds of specific revenue sources that are assigned
 for specific purposes.
- **Enterprise** funds include the water, sewer, stormwater and sanitation funds. Enterprise funds account for activity for which a fee is charged to external users for goods and/or services.
- Debt service funds include the bond and interest, local improvement district, and guaranty funds.
 Debt service funds are used to set aside resources to meet current and future debt service requirements on general long-term debt.
- Capital projects funds include capital projects, LID Construction, and Hamilton funds. Capital
 projects funds are used to account for major capital acquisitions and construction separately from
 ongoing operating activities.
- **Internal service** funds include the information systems and fleet management funds. Internal service funds are used to account for centralized services and then allocate the cost of those services within the government.

Fund financial statements generally report operations in more detail than the government-wide statements. These statements focus on its most significant or "major" funds and not on the City as a whole. Governmental fund statements follow the more traditional presentation of financial statements

MANAGEMENT'S DISCUSSION AND ANALYSIS

The City's major governmental funds are each presented in their own column. Budgetary comparison statements are presented for the funds. Traditional users of governmental financial statements will find the fund financial statements presentation more familiar. The focus is now on major funds, rather than fund types. Major funds are defined in the following manner:

- The City's main operating fund, the general fund, is always considered a major fund; and
- Each of the City's enterprise funds; and
- Any fund whose assets, liabilities, revenues or expenses are at least:
 - A. 10% of the total for all governmental OR enterprise funds; AND
 - B. 5% of the total for all governmental AND enterprise funds COMBINED.
- City management may designate any fund as a major fund believed to be important to the users
 of the City's financial statements.
- City management has determined the following funds are major funds:
 - A. The governmental funds: included are the general fund, street fund, recreation and culture fund, capital projects fund, and the Hamilton fund.
 - B. The enterprise funds: included are the water fund, sewer fund, stormwater fund and sanitation fund.

Governmental Funds. Unlike the government-wide financial statements, governmental fund financial statements focus on near-term outflows of available resources, as well as balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's current financing requirements. In particular, unrestricted fund balance may serve as a useful measure of a government's net resources available to be spent at the end of the fiscal year. These funds are reported on the "modified accrual" basis of accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the City's general government operations and the basic services it provides.

Proprietary Funds. The City maintains two different types of proprietary funds: enterprise funds and internal service funds. Enterprise funds, (as previously noted) are used to report the functions presented as business-type activities in the government-wide financial statements. The City's enterprise funds are the water, sewer, stormwater and sanitation funds. Internal service funds keep, accumulate, and allocate costs integrally among the City's various functions. Internal service funds include the fleet management fund, which accounts for fleet activities, and the information system fund, which accounts for network and communication activities. Because services provided by these internal service funds predominantly benefit governmental rather than business-type functions, they have been included within the governmental activities section in the government-wide statements.

3. Notes to the Financial Statements:

The notes to the financial statements provide additional disclosures required by governmental accounting standards and provide information to assist the reader in understanding the City's financial condition.

MANAGEMENT'S DISCUSSION AND ANALYSIS

4. Additional Supplementary Information:

The basic financial statements are followed by a section of supplementary information that further explains and supports the information in the financial statements. The supplementary information includes a budgetary comparison schedule reconciling the statutory operating activities for budgetary purposes to the generally accepted principles operating activities and fund balances, as presented in the governmental fund financial statements.

5. Statistical Information:

Following the supplementary information is the statistical section of the Annual Comprehensive Financial Report (ACFR). The statistical section consists of historical data and non-financial data useful in establishing trends and should be used in conjunction with the financial information in establishing a full representation of the overall financial health of the City.

6. Compliance Reporting:

This section contains compliance reporting on internal controls and Federal awards. Compliance reporting on Federal awards is a federal requirement when expending monies in excess of \$750,000 from Federal awards.

Accounting System and Budgetary Control

In developing and evaluating the City's accounting system, consideration is given to the adequacy of internal accounting controls. Internal control is a process utilized by the City Council, Administration, and staff, which is designed to provide reasonable assurance, not absolute assurance, regarding the achievements of objectives in the following categories: (1) the effectiveness and efficiency of operations; (2) reliability of financial reporting; and (3) compliance with applicable laws and regulations. The concept of reasonable assurance recognizes that: (1) the cost of control should not exceed the benefit likely to be derived; and (2) the evaluation of costs and benefits requires estimates and judgments by management.

The financial statements meet requirements as set forth by the Governmental Accounting Standards Board (GASB). Generally accepted accounting principles promulgated by GASB, as appropriate for cities, have been followed in handling financial transactions and in preparation of reports.

Activities of the general fund, special revenue funds, debt service fund, and capital projects fund are included in the City's annual budget. Budgetary control is maintained by the issuance of monthly financial statements, which reflect current and year-to-date expenses in comparison to budgeted amounts. Anticipated expenses are reviewed to determine that sufficient funds are available prior to commitment. As demonstrated by the statements and schedules included in the financial section of this report, the City continues to meet its responsibility for sound financial management.

Capital Assets. General capital assets include land, improvements to land, buildings, vehicles, machinery and equipment, infrastructure, and all other tangible assets that are used in operations and that have initial useful lives in excess of three years and which exceed the City's capitalization threshold of \$5,000. These capital assets provide services to the City's residents; consequently, these assets are not available for future spending. The largest portion of the City's net position (56.5%) reflects the net investment in capital assets, which totaled \$90,805,250 in FY2022.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The City must elect to either a) depreciate these assets over their estimated useful life; or b) develop a system of asset management designed to maintain the service delivery potential to near perpetuity. The City has elected to depreciate its assets. Accumulated depreciation was recorded for the first time in 2003 based on the date of acquisition and the life span of the asset.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Net position may serve as a useful indicator of a city's financial position. In the case of the City of Moscow, assets exceeded liabilities by \$160,737,104 in FY2022.

Statement of net position - as of the end of FY2022 the City's government-wide net position increased by \$11,888,523 (8.0%) to \$160,737,104. The increase identified in the business-type activities restricted net position is due to the accumulation of funds for future capital outlay. The City's business-type activities restricted fund balance of \$29,803,266 consists of \$28,702,285 for water, sewer, stormwater, and sanitation capital projects and \$1,100,981 for debt service. The City's restricted fund balance for governmental activities of \$1,595,984 consists of \$505,105 for debt service, \$300,766 for highway user tax purposes, and \$790,113 for parks and recreation as directed by Bobby Hamilton's bequest to the City in FY2000.

Changes in net position - The table above shows that the changes in net position for FY2022 governmental activities increased the City's net position by \$8,009,237 (10.8%), and business-type activities increased net position by \$3,879,686 (5.2%). The City had total expenses of \$37,824,618 and total revenues of \$49,713,141, contributing to a total net position increase of \$11,888,523 (8.0%).

MANAGEMENT'S DISCUSSION AND ANALYSIS

FINANCIAL ANALYSIS OF THE GOVERNMENT'S FUNDS

As of the end of FY2022, the City's governmental funds reported a combined ending fund balance of \$20,969,301, an increase of \$2,728,678 (15.0%) when compared to the ending fund balance of \$18,240,623 for FY2021. The increase is mainly due to accumulation of funds in the Capital Projects fund for future projects.

The unassigned fund balance for the general fund is \$2,205,027 or 10.5% of the governmental fund balance. The \$2,205,027 is mostly comprised of outstanding receivables, which are collected within 60 days. The remaining unassigned fund balance within the governmental funds is available for spending at the government's discretion in accordance with adopted budgets. The remaining fund balances are either assigned a specific purpose or project or otherwise committed.

General Fund. The general fund is the maintenance and operation fund for the City. At the end of FY2022, the general fund balance was \$8,140,786, an \$899,943 (12.4%) increase from the ending balance of \$7,240,843 for FY2021. This fluctuation in balance is attributed to capital transfers to the fleet and capital projects funds for future capital outlay.

Street Fund. The street fund is responsible for the construction and maintenance of public streets and traffic services within the City. The ending fund balance for FY2022 was \$2,328,729, an increase of \$196,846 (9.2%) from the prior year's fund balance of \$2,131,883.

Recreation and Culture Fund. The recreation and culture fund accounts for the costs of maintaining and improving parks facilities, culture and recreational programs, and community center operations in the City. At the end of FY2022, the recreation and culture fund balance was \$1,327,496, a \$279,391 (26.7%) increase from the ending balance of \$1,048,105 for FY2021. Fund balance policy requires a working capital balance of \$937,915 leaving a fund balance of \$389,581. This is made up of \$157,250 of restricted fund balance and \$232,231 of assigned fund balance.

Capital Projects Fund. The capital projects fund accounts for money set aside by the City Council for identified and unidentified future projects. Additionally, this fund is used to accumulate grant match funds and capital grant monies for anticipated future projects. The accumulation of monies for street projects include: South Couplet Beautification, South Main Underpass, and the Public Avenue Safety Improvement projects. The accumulation for parks and recreation projects include land and park developments, playground equipment, building improvements, and parkland dedication. General government projects that were designed, constructed, or completed during the year include street improvements, sidewalk improvements, park pathways, and completion of the new police facility. The fund balance increased in FY2022 by \$2,563,145 (52.3%) to \$7,464,213 due to an increase in accumulation for future capital projects.

Hamilton Fund. The Hamilton fund accounts for money bequeathed to the City by the Last Will and Testament of Mr. Bobby C. Hamilton. Mr. Hamilton's will stipulates the money be designated "for the benefit of the Parks and Recreation Department to be used as much as possible for the benefit of young children." At the end of FY2022, the ending fund balance in the fund was \$790,113. This represents a decrease of \$1,308,344 (62.3%) from FY2021 due to funding of the Palouse Ice Rink and the net difference between interest earnings and the transfers to the parks and recreation department for funding operation of the Hamilton Indoor Recreation Center (HIRC).

MANAGEMENT'S DISCUSSION AND ANALYSIS

Enterprise Funds. The City's proprietary funds consist of water, sewer, stormwater and sanitation.

The Water Fund. The water fund is responsible for the operation and maintenance of four tank reservoirs, six active wells, and the distribution systems for potable water. The City's reservoirs include two elevated tanks with capacities of 285,000 gallons and 450,000 gallons of water. However, the smaller reservoir is off-line and unlikely to return to service. The capacity of the two ground tank reservoirs is 2,000,000 gallons each. The wells are numbered, and wells #2 and #3 are supplied by the Wanapum Aquifer, while wells #6, #8, #9 and #10 access the deeper Grande Ronde Aquifer. Well #10 is now the largest producer at 3,200 gallons per minute. The consumption fees for commercial accounts are flat, while residential consumption fees are reflective of a tiered rate structure encouraging conservation. Construction of the second phase of the booster upgrades is underway with anticipated completion in FY2024. The Comprehensive Water System Plan was adopted in January 2012 and the Water Rate Study was approved in May 2020. Ending fund balance for FY2022 decreased by \$38,659 (1.6%) to \$2,354,556 due to an increase in project spending offset by a 5% overall water rate increase to support the water fund's capital improvement plan.

The Sewer Fund. The sewer fund accounts for the operation and maintenance of the Water Reclamation and Reuse Facility and the Water Reclamation conveyance system. The Water Reclamation and Reuse Facility treats on average 650 million gallons annually. The Water Reclamation conveyance system consists of 87 miles of sewer pipe and 4 lift stations pumping a combined average daily total of 300,000 gallons. Rates are comprised of two elements: a base fee and a consumption (volume) fee. Consumption fees are only assessed to commercial accounts and vary according to account classification due to contaminate loading at the Water Reclamation and Reuse Facility. The Comprehensive Sewer System Plan was adopted in June 2022 and the Sewer Rate Study approved in May 2020. Ending fund balance for FY2022 increased by \$1,273,990 (6.8%) to \$19,965,502.

The Stormwater Fund. The stormwater fund accounts for the planning, operation, construction, maintenance, and management of the stormwater control system. The stormwater system consists of 94 miles of storm drain pipe, 10 miles of open ditch, 3,000+ manholes/inlets, and 9.5 miles of receiving waters (Paradise Creek, Hogg Creek, S. Fork of the Palouse River). Rates are based on the total impervious surface area (ISA) for the three customer groups: residential properties, multi-family residential properties, and non-residential properties. The NPDES Permit went into effect in October 2019 and the stormwater fees were implemented in October 2021. Ending fund balance after the first year of operations was \$280,196.

The Sanitation Fund. The Sanitation fund accounts for all transactions related to the collection of garbage or refuse, recycling, and hauling or transportation and disposal. The City contracts with Latah Sanitation, Inc. (LSI) for collection and delivery of solid waste to the Solid Waste Processing Facility. The City contracts with Waste Connections, Inc., for transportation and final disposal of municipal solid waste at Finley Buttes Landfill in Boardman, Oregon. The City contracts with LSI for disposal of non-municipal solid waste (NMSW) at the LSI Landfill located at the Solid Waste Processing Facility site. LSI acts as the City's agent for collection of fees at the Solid Waste Processing Facility and NMSW Landfill from self-haul and commercial customers. The City also owns Moscow Recycling Center and contracts with Moscow Recycling (a division of LSI) for operations of the recycling center. The Sanitation Strategic Plan was adopted in February of 2011. The first Comprehensive Sanitation Rate Study was adopted in November of 2013 and a Sanitation Rate Study update was completed in FY2016 and FY2022. Ending fund balance for FY2022 increased by \$335,804 (3.3%) to \$10,654,476.

MANAGEMENT'S DISCUSSION AND ANALYSIS

BUDGETARY HIGHLIGHTS

In the general fund, differences between the budget and actual figures included a \$380,292 (2.6%) net increase in total revenues and a \$1,777,771 (12.0%) decrease in total expenses. The significant highlights are summarized as follows:

Revenues:

- o A \$249,482 positive variance in sales tax revenues,
- A \$208,012 positive variance in property tax revenues,
- o A \$161,999 positive variance in refunds and reimbursements,
- o A \$85,406 positive variance in licenses and permits;
- o A \$314,543 negative variance in investment earnings.

Expenses:

- o A \$1,081,154 positive variance for general government expenses,
- A \$675,912 positive variance for public safety expenses.

Budget to actual revenues for the general fund reflect a mix of positive and negative variances in revenue. The remaining categories reflect minimal positive and negative variances.

Budget to actual expenses for the general fund reflect variances in general government and public safety expenses. The remaining categories reflect minimal positive and negative variances.

Additional information comparing the City's budgeted expenses to actual expenses can be found in the financial statements on pages 81-102 of this report.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets. The City's net investment in capital assets for its governmental and business-type activities as of September 30, 2022, amounts to \$90,805,250. This net investment in capital assets includes land, buildings, collection and distribution systems, improvements, equipment, roads, streets, and bridges. The total increase in the City's net investment in capital assets for FY2022 was 8.6% (a 9.6% increase for governmental activities and a 7.1% increase for business-type activities).

MANAGEMENT'S DISCUSSION AND ANALYSIS

Major capital asset events during FY2022 included the following projects:

- City of Moscow Public Works Department:
 - Continued work on the South US95 Water / Sewer Extension (\$1,378,193)
 - Continued work on Mountain View Road Reconstruction (\$1,103,773)
 - Continued work on Sixth Street Bridge (\$544,556)
 - Continued work on Third Street Safety Improvements (\$842,535)
 - Completion of the Taylor Booster Station (\$336,425)
 - Continued work on Well 6 Building Replacement (\$347,841)
- City of Moscow Parks Department continued the development of Moscow parks and playgrounds (\$407,633)
- Completion of the new police facility (\$617,484)

CITY OF MOSCOW, IDAHO

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES - GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES Year Ended September 30, 2022

	Net change in fund balances - Total Governmental Funds	\$	2,728,678
	Amounts reported for governmental activities in the statement of activities are different because:		
	Capital outlays to purchase or build capital assets are reported in governmental funds as expenditures. However, for governmental activities, those costs are shown in the statement of net position and allocated over their estimated useful lives as annual depreciation:		
S D D	Current year capital outlay Current year depreciation		5,877,133 (2,018,095)
accom	Amounts borrowed on long-term debt are reported in the governmental funds as other financing sources. Amounts repaid on long-term debt are reported in the governmental funds as expenditures. However, for governmental activities, the borrowing and repayment of funds is reflected as outstanding long-term debt:		
nanvin	Current year repayment of long-term debt Change in interest payable Change in compensated absences		765,000 2,344 (93,646)
accompanying notes	Net pension liability and the related deferred outflows and deferred inflows are not considered available for the governmental funds in the current year:		(00,010)
	Current year net pension liability, deferred outflows, and deferred inflows		(711,228)
	Some amounts receivable will not be collected for several months after the fiscal year-ends, and they are not considered available revenues in the governmental funds. Instead, they are counted as deferred tax revenues. They are, however, recorded as revenues in the statement of activities:)	
	Current year taxes receivable Prior year taxes receivable	XV	43,121 (89,316)
	Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds. They are, however, recorded as expenditures in the statement of activities:		
	Amortization of bond premiums		66,249
	Internal service funds are used by management to charge service center equipment to individual funds. The net revenue of the internal service funds is reported with governmental activities.		1,438,997
	Change in net position - Governmental Activities	\$	8,009,237

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

The City of Moscow, Idaho, was incorporated on July 12, 1887. The City operates under a Mayor/Council form of government and provides the following services as authorized by its charter and by Title 50 of the *Idaho Code*: general government, public safety, highway and streets, culture and recreation, community development, water, sewer, stormwater, and sanitation.

United States generally accepted accounting principles require the City of Moscow's financial statements to include component units. Component units are entities for which the City of Moscow is considered to be financially accountable. The City has one discretely presented component unit that is reported in a separate column in the government-wide financial statement to emphasize that it is legally separate from the government.

Discretely Presented Component Unit. The Moscow Urban Renewal Agency (the Agency), is empowered to engage in the general economic revitalization and redevelopment of the City through acquisition and development of property, public improvements, and revitalization activities in those areas of the City determined to be in a declining condition. The Agency's governing board is made up of seven commissioners appointed by the Mayor of the City of Moscow. The City's management also provides the Agency with management and oversight through a service contract with an annual obligation of \$53,733. Complete financial statements of the Agency may be obtained at the City of Moscow's administrative offices.

B. Measurement Focus Basis of Accounting and Basis of Presentation

The financial statements of the City are prepared in accordance with United States generally accepted accounting principles (GAAP). The City uses the following two bases of accounting in these financial statements.

Economic Resources Measurement Focus and Accrual Basis of Accounting. Under this measurement focus, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Non-exchange transactions, in which the City gives (or receives) value without directly receiving (or giving) equal value in exchange, include property taxes, grants, entitlements, and donations. On an accrual basis, revenue from property taxes is recognized in the fiscal year for which the taxes are levied. Revenue from grants, entitlements, and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Current Financial Resources Measurement Focus and Modified Accrual Basis of Accounting. Under this measurement focus, revenues are recorded when they become measurable and available. For this purpose, the City considers revenues to be available if they are collected within sixty (60) days of the end of the current fiscal year-end. All material revenues, including property taxes, grants, entitlements, and donations, are considered measurable and available and are, thus, susceptible to accrual.

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. Measurement Focus Basis of Accounting and Basis of Presentation (Continued)

Current Financial Resources Measurement Focus and Modified Accrual Basis of Accounting (Continued). Fines and permits revenues are not susceptible to accrual because generally they are not measurable until received in cash. The City reports unearned revenue in its fund financial statements. Unearned revenues arise when potential revenue does not meet both the "measurable" and "available" criteria for recognition in the current period. Unearned revenues also arise when the City receives resources before it has a legal claim to them, as when recreational program or grant monies are received prior to the incurrence of qualifying expenditures.

In subsequent periods, when both revenue recognition criteria are met, or when the City has a legal claim to the resources, the liability for unearned revenue is removed from the balance sheet and revenue is recognized. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

Expenditures are recognized in the accounting period in which the fund liability is incurred, if measurable. An exception to this general rule is principal and interest on general long-term obligations, which are recognized when due. General capital asset acquisitions are reported as expenditures in governmental funds.

Restricted Resources

Program expenses are allocated to restricted program revenue first and then to the next highest level of net position/fund balance restrictions when both restricted and unrestricted resources are available.

Governmental Accounting Standards Board Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions (GASB #54) defines the different types of fund balances that a governmental entity must use for financial reporting purposes. GASB #54 requires the fund balance amounts to be properly reported within one of the fund balance categories listed below:

Nonspendable

Includes amounts that cannot be spent because they are either (1) not in spendable form or (2) legally or contractually required to be maintained intact.

Restricted

Includes amounts that can be spent only for the specific purpose stipulated by external resource providers, constitutional provisions, or enabling legislation.

Committed

Includes amounts that can only be used for the specific purposes determined by a formal action of the government's highest level of decision-making authority.

Assigned

Includes amounts that are intended to be used by the government for specific purposes but do not meet the criteria to be classified as restricted or committed.

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. Measurement Focus Basis of Accounting and Basis of Presentation (Continued)

Restricted Resources (Continued)

Unassigned

Residual classification of fund balance that includes all spendable amounts that have not been restricted, committed, or assigned.

Government-Wide Statements

The government-wide financial statements include the statement of net position and the statement of activities. These statements report financial information for the City as a whole. Individual funds are not displayed but the statements distinguish governmental activities generally supported by taxes, intergovernmental revenues, and other non-exchange transactions from business-type activities, generally financed in whole or in part with fees charged to external customers. Eliminations have been made to minimize the double-counting of internal activities, interfund services provided and used are not eliminated in the process of consolidation.

The statement of activities reports the expenses of a given function offset by program revenues directly connected with the function program. A function is an assembly of similar activities and may include portions of a fund or summarize more than one fund to capture the expenses and program revenues associated with a distinct functional activity. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function. Program revenues include (a) fees and charges paid by the recipients of goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. These revenues are subject to externally imposed restrictions to these program uses. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

The Government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, including the reclassification or elimination of internal activity (between or within funds).

Fund Financial Statements

The fund financial statements provide information about the City's fund categories. Separate statements for each fund category—governmental and proprietary—are presented. The emphasis of fund financial statements is on major funds rather than reporting funds by type. Each major fund is presented in a separate column. All remaining funds are aggregated and reported as non-major funds. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities.

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. Measurement Focus Basis of Accounting and Basis of Presentation (Continued)

Fund Financial Statements (Continued)

Governmental Funds. All governmental funds are accounted for using the current financial resources measurement focus and modified accrual basis of accounting. The City reports the following major governmental funds:

- <u>General Fund</u>. This is the City's primary operating fund. The General Fund accounts for all financial resources of the City, except those required to be accounted for in another fund.
- <u>Street Fund</u>. The "Street Fund" is responsible for the construction and maintenance of streets
 and traffic services within the City. Dedicated revenue is derived from state shared revenues
 and gas, county road, and bridge taxes.
- <u>Capital Projects</u>. The "Capital Projects Fund" accounts for money set aside by the City Council for identified future projects.
- Recreation and Culture Fund. The "Recreation and Culture Fund" accounts for the costs of
 maintaining and improving park facilities, recreational programs, and community center
 operations in the City. Revenue is derived from user fees of the park facilities.
- Hamilton Fund. The "Hamilton Fund" accounts for the money willed to the City by Mr. Bobby C. Hamilton. Mr. Hamilton's will stipulates the money is "for the benefit of the parks and recreation department to be used as much as possible for the benefit of young children." The Hamilton Fund is considered a special revenue fund

Proprietary Funds. All proprietary funds are accounted for using the flow of economic resources measurement focus and the accrual basis of accounting. Proprietary funds include enterprise funds and internal service funds.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the enterprise and internal service funds are charges to customers for sales and services. The enterprise funds also recognize as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for enterprise funds and internal service funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

The enterprise funds recognize general facility charges as non-operating revenue. General facility charges represent a charge to new customers for their share of the capital cost of increasing the capacity of the system to meet the additional demand created by the connection of new customers.

Enterprise Funds. Enterprise Funds are used to account for activities that are similar to those often found in the private sector. The City reports the following major enterprise funds:

- Water Fund. This activity accounts for the provision of water services to the residents of the City.
- Sewer Fund. This activity accounts for the provision of sewer services to the residents of the City.
- <u>Stormwater Fund</u>. This activity accounts for the provision of sewer services to the residents of the city.
- Sanitation Fund. This activity provides sanitation services to all City residents.

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. Measurement Focus Basis of Accounting and Basis of Presentation (Continued)

Fund Financial Statements (Continued)

Internal Service Funds. Internal service funds are used to allocate fleet maintenance and information systems services to other funds of the City on a cost reimbursement basis. The internal service funds are included in governmental activities for government-wide reporting purposes. As a general rule, the revenue and expenses of the internal service funds have been eliminated from the government-wide financial statements. The excess revenue or expenses for the fund are allocated to the appropriate functional activity.

C. Assets, Liabilities, Deferred Outflows/Inflows of Resources, and Net Position/Fund Balance

1. Deposits and Investments

The City's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

State statutes authorize the City to invest in obligations of the state of Idaho and its agencies, U.S. Treasury and U.S. agencies, City coupon and local improvement district bonds, repurchase agreements, tax and revenue anticipation bonds, notes, and the Idaho State Treasurer's Local Government Investment Pool (LGIP).

Investments are stated at fair value as quoted for the purchase and sale of units.

Deposits in the LGIP are stated at fair value, which is the same as the value of the pool shares. The Idaho State Treasurer oversees the LGIP under the Joint Exercises of Power provisions of *Idaho Code*.

The State Treasurer combines deposits from all governmental entities in the State, which participate in the LGIP and purchases the following types of investments:

Local Certificates of Deposit Repurchase Agreements U.S. Government Securities Bonds and debentures of "A" rated companies

The entities participating in the LGIP own a percentage of each investment held. This percentage is calculated by dividing the individual entity's deposits by the total deposits held in the LGIP. The purpose of this is to:

Increase the overall rate of return.

Reduce the risk of default.

Place each entity under the FDIC and SLIC limits of \$250,000.

Investments held at year-end are disclosed in Note 3A.

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

C. <u>Assets, Liabilities, Deferred Outflows/Inflows of Resources, and Net Position/Fund Balance</u> (Continued)

2. Receivables and Payables

Transactions between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "interfund receivables/payables" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements.

All trade accounts receivable are shown net of an allowance for doubtful accounts. No allowance for uncollectible accounts has been provided for governmental and enterprise fund receivables. Management has determined that uncollectible amounts are immaterial. Substantially, all property taxes are collected; therefore, no allowance is provided for property taxes.

The City's property taxes are levied by Latah County in November and payable on December 20 and June 20 following the levy date. Taxes are remitted to the City in the month following collection. When the taxes are delinquent a lien is filed the day following the due date. A tax deed is issued on property three years from the date of delinquency. At fiscal year-end, the receivables represent delinquent taxes. Amounts not paid within 60 days are recorded as unavailable revenue for the fund financial statements.

3. Inventory

Inventory is valued at cost, which approximates market, using the first-in, first-out method. The cost of inventories are recorded as expenditures when consumed rather than when purchased.

4. Capital Assets

The City's property, plant, and equipment, with useful lives of more than three years and an initial individual cost of more than \$5,000, are stated at historical cost. Donated capital assets are valued at their acquisition value. Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items) are reported in the applicable governmental or business-type activities columns in the government-wide financial statements.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Infrastructure assets acquired prior to implementation of GASB 34 are also reported.

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

C. <u>Assets, Liabilities, Deferred Outflows/Inflows of Resources, and Net Position/Fund Balance (Continued)</u>

4. Capital Assets (Continued)

Property, plant, and equipment of the primary government, as well as the component units, are depreciated using the straight-line method over the following estimated useful lives:

Asset Type	<u>Years</u>
Buildings and structures	10 to 40
Infrastructure systems	20 to 50
Machinery and equipment	3 to 15

5. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net assets that applies to a future period and so will not be recognized as an outflow of resources (expense/expenditure) until then. For example, grant expenditures paid in advance of meeting timing requirements.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net assets that applies to a future period and so will not be recognized as an inflow of resources (revenue) until that time. The item "unavailable revenue" is reported only in the governmental funds balance sheet. The governmental funds report unavailable revenues from two sources: property taxes and special assessments. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available.

6. Compensated Absences

Vested or accumulated vacation leave that is expected to be liquidated with expendable available financial resources is reported as an expenditure of the governmental fund that will pay it. Only the portion of vested or accumulated leave that has matured is reported as a liability in the governmental funds. Vested or accumulated vacation leave of proprietary funds is recorded as an expense and liability of those funds as the benefits accrue to employees. No liability is recorded for nonvesting accumulating rights to receive sick pay benefits. However, a liability is recognized for the vesting portion of accumulating sick leave benefits that is estimated will be taken by the employee at retirement. Each fund is responsible to pay for its own compensated absences.

The funds that have historically paid for compensated absences are the general, street, recreation and culture, fleet, information systems, and enterprise funds. City-wide compensated absences accrued and paid out were \$91,971 and \$136,418, respectively, during the current year. This resulted in a change of liability from \$1,147,403 to \$1,102,956. The current amount of \$137,870, which is shown on the statement of net position, has been estimated by the City based on a reasonable estimate of expected usage.

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

C. <u>Assets, Liabilities, Deferred Outflows/Inflows of Resources, and Net Position/Fund Balance (Continued)</u>

7. Long-Term Obligations

In the government-wide financial statements and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts are amortized over the life of the bonds using the straight-line method. Bonds payable are reported net of the applicable bond premium or discount.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures in the current period.

8. Cash Flow Statement

The City considers all bank accounts restricted, and unrestricted cash to be cash for the proprietary and internal service funds statement of cash flow purposes.

9. Use of Estimates

Management of the City uses estimates and assumptions in preparing financial statements in accordance with United States generally accepted accounting principles. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported revenues and expenses. Actual results could vary from the estimates that management uses.

10. Adoption of New Accounting Standard

As of October 1, 2021, the City adopted GASB Statement No. 87, *Leases*. The implementation of this standard establishes a single model for lease accounting based on the foundational principle that leases are financing of the right to use an underlying asset. The standard requires recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. The City did not identify lease contracts that required recognition under the provision of GASB Statement No. 87, resulting in no prior effect on the beginning net position and fund balance as of October 1, 2021.

NOTES TO FINANCIAL STATEMENTS

2. 2. BUDGETARY AND LEGAL COMPLIANCE

A. Budgetary Information

The City Council follows these procedures in establishing the budgetary data reflected in the financial statements:

Prior to September 1, the City Supervisor submits to the City Council a proposed operating budget for the fiscal year commencing the following October 1 and ending September 30. The operating budget includes proposed expenditures and the means of allocating resources by fund.

Public hearings are conducted at various times during the year to obtain taxpayer comments.

Prior to the submission to the county auditor on the Thursday following the first Tuesday in September, the budget is legally enacted through passage of an appropriations ordinance. The budget covers all governmental and proprietary fund types. The City adopts budgets on the modified accrual basis of accounting for all governmental fund types. The City adopts budgets on the accrual basis of accounting for proprietary fund types. At any time during the fiscal year, the Council may amend the appropriations ordinance for unforeseen and unanticipated revenues by following the same procedures used during the budget adoption process.

Revisions that alter the total expenditures of any fund must be approved by the City Council and the legal level of budgetary control is the fund level.

For the fiscal year ended September 30, 2022, no fund expenditures exceeded appropriations.

3. **DETAILED NOTES ON ALL FUNDS**

A. Deposits and Investments

They Deposits and investment policies are disclosed in Note

The bank statement cash balances amounted to \$2,236,809. Of the bank statement cash balances, \$277,360 was covered by federal depository insurance.

As of September 30, 2022, the City had the following investments and maturities:

				Interest	
	Less than 1	1-5	Greater than 5	Rate	Fair Value
U.S. Government obligations	\$ 3,185,284	\$ 12,996,054		0.10-2.13	\$ 16,181,338

NOTES TO FINANCIAL STATEMENTS

3. DETAILED NOTES ON ALL FUNDS (CONTINUED)

A. <u>Deposits and Investments (Continued)</u>

Other investments in the governmental activities include gold, silver, and jewelry. The City did not invest in corporate stock or these other investments. They were received from the estate of Bobby C. Hamilton. Other investments also include accrued income held in the City's Moreton Asset Management investment account.

Interest rate risk: The risk that changes in interest rate will reduce the value of the City's investments. As a means of limiting exposure to loss the City structures their portfolio so that maturities meet cash requirements for ongoing operations, thereby avoiding the need to sell securities on the open market prior to maturity. Also, the policy calls for investing funds primarily in shorter-term securities and limiting the average maturity of the portfolio.

Credit risk: As of September 30, 2022, the City's investment in the LGIP is unrated. The City's investments held through private investment banks are a variety of U.S. agency bonds, certificates of deposit, corporate bonds, and money market funds. The rating of these investments vary per type of investment. Overall Moody's rating of the Moreton Asset Management investment account is stated as A1.

Concentration of credit risk: The City's investment policy states that the City shall mitigate concentration risk by:

- 1. Limiting investments to avoid over concentration in securities from a specific issuer or business sector,
- 2. Limiting investment in securities that have higher credit risks,
- 3. Investing in securities with varying maturities, and
- 4. Continuously investing a portion of the portfolio in readily available funds such as the LGIP, money market funds, or overnight repurchase agreements to ensure that appropriate liquidity is maintained in order to meet ongoing obligations.

Custodial Credit Risk – Investments: For an investment, this is the risk that, in the event of the failure of the counterparty, the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The City's policies regarding investments require that the City only uses financial institutions and depositories approved to do business in the state of Idaho. Policies also require that the City only invests in securities allowed by Idaho Code 50-1013 and uses brokers that qualify under Securities & Exchange Commission Rule 15C3-1.

Fair Value Measurements - Investments are measured at fair value on a recurring basis. Recurring fair value measurements are those that GASB Statements require or permit in the statement of net position at the end of each reporting period. Fair value measurements are categorized based on the valuation inputs used to measure an asset's fair value.

NOTES TO FINANCIAL STATEMENTS

3. DETAILED NOTES ON ALL FUNDS (CONTINUED)

A. Deposits and Investments (Continued)

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.
- Level 2 Inputs to the valuation methodology include:
 - quoted prices for similar assets or liabilities in active markets;
 - quoted prices for identical or similar assets or liabilities in inactive markets;
 - inputs other than quoted prices that are observable for the asset or liability;
 - inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following sets forth, by level, the fair value hierarchy. The City held investment securities at fair value that meet the level 2 methodology.

The following table represents the City's investments that are measured or disclosed at fair value on a recurring basis. The City does not have any financial assets that are measured at fair value on a non-recurring basis.

		F	air Value Hierarch	у

Total	\$	23,078	\$ 5	,862	\$;	28,940	

City as a Lessor. The City, as a lessor, has entered into lease agreements involving office space, fiber optic infrastructure, and cell phone towers. The total amount of inflows of resources, including lease revenue, interest revenue, and other lease-related inflows, recognized during the fiscal year was \$1,381,647. This total includes \$1,301,913 of variable and other payments not previously included in the measurement of the lease receivable.

4. OTHER INFORMATION

A. Risk Management

The City of Moscow purchases liability and property insurance through the Idaho Counties Risk Management Program (ICRMP). ICRMP is an all-lines aggregate insurance program providing liability, property, and casualty insurance coverage to Idaho's counties and other political subdivisions on a voluntary participation basis. ICRMP assumes or reinsures all risk covered for claims. Participants are charged an annual insurance premium. The City is responsible for up to the first \$2,500 of any loss claim depending on the type of claim.

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION (CONTINUED)

A. Risk Management (Continued)

The general insurance limits are as follows:

Property damage
General liability
Automobile liability
Law enforcement liability
Sexual molestation
Errors or omissions liability
Employee medical insurance benefit liability
Uninsured/underinsured motorist

Crime insurance and bond Boiler/Machinery damage Chemical spraying activities Total insured value \$3,000,000 per occurrence \$3,000,000 per occurrence \$3,000,000 per occurrence \$3,000,000 per claim \$3,000,000 per occurrence \$3,000,000 per claim \$100,000 per person, \$300,000 per accident \$500,000 per occurrence \$100,000,000 in aggregate \$500,000 per occurrence

B. Public Employee Retirement System of Idaho (PERSI)

Plan Description. All permanent full-time employees of the City except firefighters who were hired before October 1, 1980, participate in the Public Employee Retirement System of Idaho (PERSI) Base Plan, a cost-sharing, multiple-employer public retirement system created by the Idaho State Legislature. It is a defined benefit plan requiring that both the member and the employer contribute. Designed as a mandatory system for eligible state and school district employees, the legislation provided for political subdivisions to participate by contractual agreement with PERSI. The cost to administer the Plan is financed through the contributions and investment earnings of the Plan.

The City contributes to the Firefighters' Retirement Fund Plan (FRF) for firefighters who were hired before October 1, 1980. The FRF is a cost-sharing, multiple-employer defined benefit pension plan administered by PERSI that covers a closed group of firefighters who were hired before October 1, 1980, and who received benefits in addition to those provided under the PERSI Base Plan. The cost to administer the Plan is financed through the contributions and investment earnings of the FRF. Additional FRF funding is obtained from receipts from a state fire insurance premium tax.

PERSI issues a publicly available financial report that includes financial statements and the required supplementary information for PERSI Base Plan and the FRF. That report may be obtained on the PERSI website at www.persi.idaho.gov.

Pension Benefits. After five years of credited service, members become fully vested in retirement benefits earned to date. Members are eligible for retirement benefits upon attainment of the ages specified for their employment classification. For each year of credited service, the annual service retirement allowance is 2.0 percent (2.3 percent for police/firefighters under the Base Plan) of the average monthly salary for the highest consecutive 42 months for covered members of the Base Plan. The Base Plan is required to provide a 1 percent minimum cost of living increase per year provided the *Consumer Price Index* increases 1 percent or more. The PERSI board has the authority to provide higher cost of living increases to a maximum of the *Consumer Price Index* movement or 6 percent, whichever is less; however, any amount above the 1 percent minimum is subject to review by the Idaho Legislature.

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION (CONTINUED)

B. Public Employee Retirement System of Idaho (PERSI) (Continued)

Pension Benefits (Continued). The FRF cost of living increase is based upon the increase in the statewide average firefighter's wage. The retirement benefit for covered members of the FRF is based on *Idaho Code*, Title 72, Chapter 14.

Member and Employer Contributions. Member and employer contributions paid to PERSI are set by statute and are established as a percent of covered compensation. Contribution rates are determined by the PERSI board within limitations, as defined by state law. The Board may make periodic changes to employer and employee contribution rates (expressed as percentages of annual covered payroll) that are adequate to accumulate sufficient assets to pay benefits when due.

The contribution rates for employees are set by statute at 60 percent of the employer rate for general employees and 72 percent for police and firefighters. The employer contribution rate is set by the Retirement Board and is 11.94 percent of covered compensation for general employees and 12.28 percent for police and firefighters under the Base Plan, and 12.28 percent for FRF members. The City contributions required and paid were \$1,273,268 \$1,208,439, and \$1,218,133 for the three years ended September 30, 2022, 2021, and 2020, respectively. Any fund that has covered payroll has contributed to liquidating the net pension liabilities. The highest contributors are the City's major funds.

Pension Assets, Pension Expense (Revenue), and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions. At September 30, 2022, the City reported a liability of \$10,494,024 for its proportionate share of the net pension asset under the Base Plan and a net pension asset of \$748,582 for its proportionate share of the FRF. The net pension assets were measured as of July 1, 2022, and the total pension asset used to calculate the net pension liability was determined by an actuarial valuation as of that date. The City's proportion of the net pension assets was based on the City's share of contributions in the Base Plan pension plan and the FRF pension plan relative to the total contributions of all participating PERSI employers in each plan. At July 1, 2022, the City's proportion was 0.2575785 percent for the base plan and 0.3646443 percent for the FRF.

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION (CONTINUED)

B. Public Employee Retirement System of Idaho (PERSI) (Continued)

Pension Assets, Pension Expense (Revenue), and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions (Continued). For the year ended September 30, 2022, the City recognized a net gain on pension expense of \$1,038,284 (\$711,228 for governmental funds, \$259,822 for business-type funds, and \$67,234 for internal service funds) for PERSI. At September 30, 2022, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

PERSI BASE PLAN	Deferred Outflows of	Deferred Inflows of
	Resources	Resources
Employer contributions made subsequent to the		
measurement date of June 30, 2022	\$ 313,000	
1/1/		
Differences between expected and actual experience	\$ 1,153,960	\$ 46,838
Changes in the employer's proportion and differences		
between the employer's contributions and the		
employer's proportionate contributions		\$ 161,752
Changes in assumptions or other inputs	\$ 1,710,840	
Net difference between projected and actual earnings on		
pension plan investments	\$ 2,778,070	

PERSI FRF PLAN	Deferred Outflows of Resources	Deferred Inflows of Resources
Employer contributions made subsequent to the measurement date of June 30, 2022		
Net difference between projected and actual earnings on pension plan investments	\$ 363,519	

Contributions made by the employer subsequent to the measurement date for the Base Plan but before the end of the City's reporting period, will be recognized as an increase of the net pension asset in the year ending September 30, 2022. These contributions were \$313,000 and are reported as deferred outflows of resources and will be recognized as an increase of the net pension asset in the fiscal year ending September 30, 2022. The FRF Plan is currently going through a rate holiday, requiring no payments in the fiscal year.

The average of the expected remaining service lives of all employees that are provided with pensions through the system (active and inactive employees) determined at July 1, 2021, the beginning of the measurement period ended June 30, 2022, is 4.8 and 4.8 for the measurement period June 30, 2021 for the Base Plan. The FRF is a closed plan and the average expected remaining service life used is 1 year.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense (revenues) as follows:

	<u>Base Plan</u>
2023	\$ 1,183,107
2024	1,309,054
2025	595,928
2026	1,982,672

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION (CONTINUED)

B. Public Employee Retirement System of Idaho (PERSI) (Continued)

Actuarial Assumptions. Valuations are based upon actuarial assumptions, the benefit formulas, and employee groups. Level percentages of payroll normal costs are determined using the Entry Age Normal Cost Method. Under the Entry Age Normal Cost Method, the actuarial present value of the projected benefits of each individual included in the actuarial valuation is allocated as a level percentage of each year's earnings of the individual between entry age and assumed exit age. PERSI amortizes any unfunded actuarial accrued liability based on a level percentage of payroll. The maximum amortization period permitted under Section 59-1322, *Idaho Code*, is 25 years.

The total pension liability in the June 30, 2022, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation 2.30% Salary increases including inflation 3.05%

Investment rate of return 6.35%, net of pension plan investment expense

Cost of Living Adjustments (COLA) 1.00%

Mortality rates were based on the RP – 2000 combined table for healthy males or females as appropriate with the following offsets:

Set back 3 years for teachers
No offset for male fire and police
Forward 1 year for female fire and police
Set back 1 year for all general employees and all beneficiaries

An experience study was performed for the period July 1, 2013 through June 30, 2017, which reviewed all economic and demographic assumptions other than mortality. The total pension liability as of June 30, 2022, is based on the results of an actuarial valuation date of July 1, 2022.

The long-term expected rate of return on pension plan investments was determined using the building block approach and a forward-looking model in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Even though history provides a valuable perspective for setting the investment return assumption, the System relies primarily on an approach, which builds upon the latest capital market assumptions. Specifically, the System uses consultants, investment managers, and trustees to develop capital market assumptions in analyzing the System's asset allocation. The assumptions and the System's formal policy for asset allocation are shown below. The formal asset allocation policy is somewhat more conservative than the current allocation of the System's assets.

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION (CONTINUED)

B. Public Employee Retirement System of Idaho (PERSI) (Continued)

The best-estimate range for the long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation.

	Target	Long-Term Expected Nominal Rate of Return	•
Asset Class	Allocation	(Arithmetic)	(Arithmetic)
Core/Fixed Income	30.00%	1.80%	(0.20)%
Broad US Equities	55.00%	8.00%	6.00%
Developed Foreign Equities	15.00%	8.25%	6.25%
Assumed Inflation – Mean		2.00%	2.00%
Assumed Inflation Standard Deviation		1.50%	1.50%
Portfolio Arithmetic Mean Return		6.18%	4.18%
Portfolio Standard Deviation		12.29%	12.29%
Portfolio Long-Term (Geometric)			
Expected Rate of Return		5.55%	3.46%
Assumed Investment Expenses Portfolio Long-Term (Geometric) Expected Rate of Return,		0.40%	0.40%
Net of Investment Expenses		5.15%	3.06%

Discount Rate. The discount rate used to measure the total pension liability was 6.35 percent. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rate. Based on these assumptions, the pension plan's net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The long-term expected rate of return was determined net of pension plan investment expense but without reduction for pension plan administrative expense.

NOTES TO FINANCIAL STATEMENTS

B. Public Employee Retirement System of Idaho (PERSI) (Continued)

Sensitivity of the City's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate. The following presents the City's proportionate share of the net pension liability and asset calculated using the discount rate of 6.35 percent, as well as what the City's proportionate share of the net pension liability and asset would be if it were calculated using a discount rate that is 1-percentage-point lower (5.35 percent) or 1-percentage-point higher (7.35 percent) than the current rate:

		Current	
	1% Decrease	Discount Rate	1% Increase
	(5.35%)	(6.35%)	(7.35%)
City's proportionate share of the Base			
Plan net pension liability (asset)	\$ 18,520,923	\$ 10,494,023	\$ 3,924,213

Pension Plan Fiduciary Net Position. Detailed information about the pension plan's fiduciary net position is available in the separately issued PERSI financial report. PERSI issues a publicly available financial report that includes financial statements and the required supplementary information for PERSI. That report may be obtained on the PERSI website at www.persi.idaho.gov.

C. Hamilton Estate

In January 2000, Mr. Bobby C. Hamilton passed away and made a bequest of the majority of his estate to the City. To comply with the requirements of the bequest, the City initially recorded these assets in two separate funds. Mrs. Hamilton passed away during 2011, at which time the principal amount became unrestricted to the City and the assets were transferred into the Hamilton Fund and the second fund was closed.

The Hamilton Fund: Mr. Hamilton's bequest states that the money shall be used "for the benefit of the Parks and Recreation Department to be used as much as possible for the benefit of young children." This fund is classified as a special revenue fund and is considered a major fund.

In addition to various cash and investments received from the estate, the City also received jewelry, gold bars, ingots, medallions, and silver coins. The City sold the majority of these assets during the fiscal year ending 2010. At September 30, 2022, the City had in its possession jewelry appraised at \$37,103; gold bars, ingots, and medallions with an approximate value of \$4,665; and silver coins with an approximate value of \$7,600. These assets have been recorded as investments on the City's books. The City intends to liquidate these assets.

D. Contingencies and Commitments

1. Grant and Contract Expenditures

Grant and contract expenditures are subject to the approval of various granting and contracting agencies. To be eligible for reimbursement of expenditures made under federal, state, and locally funded programs, the City must comply with regulations established by the related agency and non-compliance could result in disallowed costs and a liability for reimbursement received. The City expects such amounts, if any, to be immaterial.

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION (CONTINUED)

D. Contingencies and Commitments (Continued)

2. Litigation

As of September 30, 2022, there were no lawsuits or claims against the City that would have a material effect on the financial statements.

3. Solid Waste Landfill Closure Costs

The City is responsible for the costs associated with minimum closure requirements for an inert commercial/demolition non-municipal solid waste landfill and composting area. The City has established a transfer station whereby all municipal solid waste is hauled to a permanent solid waste facility in Boardman, Oregon.

The Non-MSW landfill closure and post-closure, as required by the City, State, and Federal requirements, is allocated based on a remaining useful life of 21 years, or 2040. Total current costs of landfill closure and post-closure care are estimates and subject to annual changes due to a variety of factors. The City began recording expenses for future closure and post-closure according to a 20-year expense recognition schedule during 2004. The liability for these costs increased by \$13,725 during the current fiscal year. Of the total estimated \$274,430 closure and post-closure cost, \$13,682 has yet to be amortized as of September 30, 2022.

E. Fund Balance Classifications

Restricted. Restricted net position/fund balances represent amounts whose use is restricted by creditors, grantors, laws and regulations of other governments, or through enabling legislation. Restrictions for the City include revenue received from the state of Idaho for highway user fees that is restricted for the specific use of road improvements by the City's street fund. Restrictions of debt proceeds and other resources of the bond and interest fund and the sewer fund exist for the specific purpose of satisfying debt service requirements set forth by the City's individual bond related covenants. The City also has restricted funds relating to the Hamilton fund, which all funds were designated in the will of the donor for the specific purpose of benefitting the recreation and culture fund.

Committed Fund Balance. The fund balance is committed and can only be used for specific purposes pursuant to constraints imposed by a City Council approved ordinance and cannot be used for any other purpose. A City ordinance is also required to modify or rescind any fund balance commitment. Committed fund balance includes funds for drug enforcement and public art. The City has also committed funds for the purpose of maintaining proper working capital balances in governmental funds.

Assigned Fund Balance. The fund balances classified as assigned are for use for specific purposes but do not have rise to the level of restricted or committed. It is the policy of the City that all fund balance assignments are to be authorized by the City council. The City has assigned balances that include the assignments for compensated absences, VEBA proceeds, and for the activity of special revenue, capital project, and debt service funds.

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION (CONTINUED)

E. Fund Balance Classifications (Continued)

Unassigned Fund Balance. The unassigned fund balance is in the general fund and has not been restricted, committed, or assigned to specific purposes within the general fund. In governmental funds other than the general fund, if expenditures incurred for specific purposes exceed the amounts that are restricted, committed, or assigned to those purposes, it may be necessary to report a negative unassigned fund balance in that fund.

NONMAJOR GOVERNMENTAL FUNDS

Special Revenue Funds

Special revenue funds are used to account for specific revenues that are legally restricted to expenditure for a particular purpose.

<u>Moscow School District Community Playfields</u> – To account for revenue and costs associated with an agreement to jointly develop and jointly use the District owned property located adjacent to Joseph Street and Mountain View Road into a high quality athletic field complex to serve the community.

<u>1912 Center Fund</u> – To account for revenues and costs associated with the renovation of the 1912 Community Center. Financing is provided by rental charges, grants, and donations.

<u>Transit Center Fund</u> To account for revenues and costs associated with the operation of the City of Moscow Intermodal Transit Center. Financing is provided by user fees, grants and donations.

Capital Projects Funds

<u>LID Construction Fund</u> – To account for the financing and construction of Local Improvement Districts consisting of benefited properties and public improvement developments. Financing is backed by the full faith and credit of the City.

Debt Service Funds

<u>Bond and Interest</u> – To account for the accumulation of resources and payment of general obligation bond principal and interest from governmental resources and special assessment bond principal and interest from special assessment levies when the government is obligated in some manner for the payment.

Special Assessments – To account for the accumulation of resources and payment of bonds and warrants used to finance Local Improvement Districts (LID).

City of Moscow, Idaho Statistical Section (Unaudited)

This part of the City of Moscow's comprehensive annual financial report presents detailed information as a context for understanding what information in the financial statements, note disclosures, and required supplementary information says about the City's overall health.

Contents	<u>Page</u>
Financial Trends	109
These schedules contain trend information to help the reader understand	
how the City's financial performance and well-being have changed over time.	
Revenue Capacity	113
These schedules contain information to help the reader assess the factors	
affecting the City's ability to generate its property and sales taxes.	
Debt Capacity	118
These schedules present information to help the reader assess the	
affordability of the City's current levels of outstanding debt and the City's	
ability to issue additional debt in the future.	
Demographic and Economic Information	125
These schedules offer demographic and economic indicators to help the	
reader understand the environment within which the City's financial activities	
take place and to help make comparisons over time and with other	
governments.	
Operating Information	127
These schedules contain information about the City's operations and	
resources to help the reader understand how the City's financial information	
relates to the services the City provides and the activities it performs.	
Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year. The City implemented Statement No. 34 in 2003; schedules presenting government-wide information include information beginning in that year.

Notes: Water and Sewer rates have risen over the last years due to raising capital to replace aging infrastructure and to meet DEQ requirements.

GASB 62, 63 and 65 implemented in 2013. GASB 68 implemented 2015.

State Sales Tax Revenue Sharing was reclassified to Sales Tax from State Revenue Sharing in FY2021.

The Stormwater utility became operational in FY2022.

Notes:

Full-time employees are scheduled to work 2,080 hours per year (including vacation and sick leave).

Employees with less than full-time equivalent employment are calculated by dividing total labor hours by 2,080.

Moscow School Community Playfields fund was added in FY2015 with one FTE.

Utility Locate Technician and Forensic Computer Detective added in 2016.

Economic Development Specialist position eliminated in 2016.

Videographer and Wastewater Conveyance Operator added in 2017.

Legal Department Specialist went from part-time to full-time; Environmental Education and Sustainability Programs Specialist went from part-time to full time; IS Computer Systems Specialist position added in FY2020.

FY2021 reorganization of City management structure resulted in positions moving and/or consolidating functions/programs.

Stormwater utility was added in FY2022 and 2 FTE's were added to Parks.

INDEPENDENT AUDITOR'S REPORT - GOVERNMENT AUDITING STANDARDS

Members of the City Council City of Moscow, Idaho Moscow, Idaho

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component unit, each major fund, and the aggregate remaining fund information of the City of Moscow, Idaho, as of and for the year ended September 30, 2022, and the related notes to the financial statements, which collectively comprise the City of Moscow, Idaho's basic financial statements and have issued our report thereon dated March 3, 2023.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the City of Moscow, Idaho's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City of Moscow, Idaho's internal control. Accordingly, we do not express an opinion on the effectiveness of the City of Moscow, Idaho's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City of Moscow, Idaho's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of the financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the City's internal control or on compliance. This report is an integral part of an audit performed in accordance with rable for Government Auditing Standards in considering the City's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT - UNIFORM GUIDANCE

Members of City Council City of Moscow, Idaho Moscow, Idaho

Report on Compliance for Each Major Federal Program

Opinion of Each Major Federal Program

We have audited the City of Moscow, Idaho's compliance with the types of compliance requirements described in the OMB's *Compliance Supplement* that could have a direct and material effect on each of the City of Moscow, Idaho's major federal programs for the year ended September 30, 2022. The City of Moscow, Idaho's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

In our opinion, the City of Moscow, Idaho, complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended September 30, 2022.

Basis for Opinion of Each Major Federal Program

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Our responsibilities under those standards and the Uniform Guidance are further described in the Auditor's Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of the City of Moscow, Idaho, and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for each major federal program. Our audit does not provide a legal determination of the City of Moscow, Idaho's compliance with the compliance requirements referred to above.

Responsibilities of Management for Compliance

Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules, and provisions of contracts or grant agreements applicable to the City of Moscow, Idaho's federal programs.

Auditor's Responsibilities for the Audit of Compliance

Our objectives are to obtain reasonable assurance about whether material noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on the City of Moscow, Idaho's compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the *Uniform Guidance* will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment made by a reasonable user of the report on compliance about the City of Moscow, Idaho's compliance with the requirements of each major federal program as a whole.

In performing an audit in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the *Uniform Guidance*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material noncompliance, whether due to fraud or error, and design
 and perform audit procedures responsive to those risks. Such procedures include examining, on a
 test basis, evidence regarding the City of Moscow, Idaho's compliance with the compliance
 requirements referred to above and performing such other procedures as we considered necessary
 in the circumstances.
- Obtain an understanding of the City of Moscow, Idaho's internal control over compliance relevant to
 the audit in order to design audit procedures that are appropriate in the circumstances and to test
 and report on internal control over compliance in accordance with the *Uniform Guidance*, but not for
 the purpose of expressing an opinion on the effectiveness of the City of Moscow, Idaho's internal
 control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

Report on Internal Control Over Compliance

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the Auditor's Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses or significant deficiencies in internal control over compliance may exist that were not identified.

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the *Uniform* MANAGEMENT PERMENT PROPERTY. Guidance. Accordingly, this report is not suitable for any other purpose.
